APPROVED BY: **SARAH**
The above features analysis
leads to the following:
A high level of accuracy
and efficiency. Considerable
application of the features
is required to achieve
high quality output.
The system is designed
through extensive testing
and validation. It is well
documented and provides
a solid foundation for future
development.

Differences in 2D Decisions
communicated by you are
handled by the system and make
the overall process more efficient
and accurate. I thank you
for your support and cooperation.

Thanking you very sincerely
SARAH

Important Registration Information: If you are a registered user of the Internet Banking Beta Test, please note the following:
We encourage you to register and use our Internet Banking Beta Test service to familiarize yourself with the features. Once you have completed your registration, you will receive an e-mail message confirming your registration. You will also receive an e-mail message confirming each time you log on to the Internet Banking Beta Test service. Please note that these e-mail messages may be delayed due to the volume of e-mail sent to our Internet Banking Beta Test service. In addition, you may receive multiple e-mail messages if you log on to the Internet Banking Beta Test service more than once per day. To help us identify you as a registered user of Internet Banking Beta Test, we ask that you do not change your e-mail address or delete the Internet Banking Beta Test e-mail messages.
